

REDUCTION OF MOULD

IN A MALE TOILET

Field test location:

A male toilet in Singapore.

Conducted by:

Ugene Laboratory, Singapore.

Test method:

America Public Health Association, 19th Edition, 1995 - Potato Dextrose Agar @ 25 deg C, 5 days; Air Monitoring - Total Mould Count.

Test results:

The Medklinn Air+Surface Sterilizer was very effective at bringing down mould count at ambient condition to approximately 50% reduction.
